Application for an internship in Web

September 2020 – January 2021

Hello,

I'm a 20-year-old student from France. I am looking for a web development internship position. I believe my experience makes me an ideal candidate and will suit your expectations.

I'm currently in 3rd year IT engineering school at CESI in Saint-Nazaire, France. This semester, my learning was mainly focused in web development and networking. My first 2 years were mostly focused on mathematics and physics.

I already made 3 internships in web design and development. I love to create special web applications with specific needs and communicate with clients to understand their needs.

I would like to find an internship in Japan to grow my experience, serve clients and discover Japanese Culture. With the right opportunities and experience working with different people, I believe that I will have a successful start working after graduation.

This internship will provide me with the ideal opportunity to assist your organization while expanding my web development skills. The internship should start next September (or mid-August 2020) for a four months period (15-20 weeks) to end in early February.

I hope that you will find that my qualifications match with yours expectations. If so, I will be available for an skype interview at a mutually convenient time. I look forward to speaking with you.

Thank you for your consideration,

Yours sincerely,

Benjamin Hartmann
